2019 / 2020 ACE Hendra Risk Declaration

Event Name: 2019 ACE Breeding Inspection and Assessment Tour

Owner or person in charge of horse(s)

Full name:	
Full address (residential or business)	
Phone number	
Email	

Hendra Vaccination is not compulsory for the ACE Breeding Inspection and Assessment Tour 2019 however the ACE acknowledges the advice of Workplace Health and Safety Queensland, Queensland Health and Biosecurity Queensland, that vaccination is the single most effective way of reducing the risk of Hendra virus infection in horses and provides a work health and safety and public health benefit. Strategic vaccination of horses is encouraged, and horse owners should discuss their individual risk with their private veterinarian.

I, _____ the owner of the horse(s) participating (described in the ACE Horse Health Declaration) herewith acknowledge full responsibility to present my horse(s) with no current Hendra vaccination. I confirm, that the presented horse(s) have not been able to contract Hendra Virus within the last 16 days.

In the case of a Hendra Virus Infection / outbreak of Hendra Virus, I confirm that I knowingly presented my horses unvaccinated and I am fully responsible and liable regarding possible infection of all ACE Group Inc. representatives attending the assessment and I agree to take full responsibility and will be held liable to any outcome this infection may cause for the ACE Studbooks Inc. representatives.

Furthermore, I take full responsibility that no unvaccinated horse will be in contact with any ACE representative at any time of the assessment. I agree to provide a separated and safe area for any ACE representative to conduct the assessment.

Definition of non-vaccinated horse:

The ACE Group Inc. considers a non-Hendra vaccinated horse as any horse of any age with no current Hendra Vaccination Status. Please note that foals are only covered by the mare's vaccination certificate (given the mare was vaccinated during pregnancy) up to the age of 4 month. After the age of 4 month the foal is considered not vaccinated unless a current vaccination certificate is available.

Please note: ACE Group Inc. representatives will not take any DNA hair samples of non-Hendra vaccinated horses – if necessary, the owner agrees for a veterinarian to get this DNA hair sample at the owner's expense.
